	Title	Current OR
1	System and method for controlling a wireless packet switched voice call	370/401
2	Method of monitoring calls in an internet protocol (IP)-based network	370/235
3	Routing information packets in a distributed network	370/328
4	Roaming and hand-off support for prepaid billing for wireless data networks	455/406
5	Method and system for identifying a user	455/445
6	Wireless communication access point	455/25
7	System and method for routing voice over IP calls	370/352
8	Providing a supplementary service in a mobile communications system	455/466
9	Universal IP-based and scalable architectures across conversational applications using web services for speech and audio processing resources	379/88.17
10	Convergent wireless communication system	455/450
11	System and method for providing wireless telephony over a packet-switched network	370/401
12	Storing information about a telephony session	379/201.02
13	Subscriber information service center (SISC)	455/456.1
14	Terminal roaming operations between intergenerational wireless networks	455/433
15	Communication system method for setting up connections between terminals of a first and second communication network	370/328
16	Call routing method for 3G.IP networks	370/328

	Title	Current OR
17	Method and system for interfacing a legacy circuit-switched network with a packet-switched network	379/229
18	Virtual loop carrier system	370/352
19	Method for redirecting a calling phone from a finder service to a destination phone	379/93.17
20	Providing communications services	709/227
21	Method and system of screening and control of telephone calls while using a packet-switched data network	370/352
22	Method and apparatus for integrated wireless communications in private and public network environments	370/356
23	Customized presence information delivery	379/93.01
24	System for controlled provisioning of telecommunications services	455/414.1
25	Common access between a mobile communications network and an external network with selectable packet-switched and circuit-switched and circuit-switched services	370/353
26	Virtual loop carrier system with gateway protocol mediation	370/352
27	System for managing telecommunications services through use of customized profile management codes	455/414.1
28	Power supply for a light pole mounted wireless antenna	343/721
29	System and method for implementing VoIP over ANSI-136-A circuit/switched/packet-switched mobile communications networks	370/352
